Jason Atchley connects complex legal, regulatory, and compliance data challenges with the experts who can solve them. As Senior Managing Director and a member of the iDS Managing Director's team, he partners with corporations and law firms on their highest-stakes matters, helping them define the core questions and mobilize the right technical and subject matter experts to deliver defensible answers.

With more than a decade of advising clients across disputes, investigations, and forensic technology, Jason has built enduring global partnerships with Fortune 500 corporations and AmLaw 200 firms. His practice focuses on Forensic Technology Services, Disputes and Investigations, Expert Services, Global Cross-Border Investigations, Compliance, Cyber Risk, eDiscovery, and the strategic deployment of AI in legal and compliance workflows. Known for a relentless, solution-oriented approach, he excels at structuring complex, multi-jurisdictional engagements that span major regulatory inquiries with federal agencies, antitrust actions, and complex cross-border investigations, as well as landmark IP and emerging technology disputes.

Prior to joining iDS, Jason served as Senior Director at a global consultancy, where he built and scaled the corporate forensics, eDiscovery, and legal operations practice. Earlier in his career, he held global and regional leadership roles at legal technology and eDiscovery service providers. Throughout his career, Jason has guided clients from legacy, high-cost legal operations toward proactive, AI-enabled workflows, while maintaining the principle that subject-matter experts, not the technology, own the conclusion.

Jason earned his Bachelor of Arts in Economics at The University of Texas at Austin and his Juris Doctor at SMU Dedman School of Law. He serves as Membership Director for the ACEDS Central Texas Chapter.

Jason lives in Austin, Texas, with his family, where he spends his time cheering on the Longhorns, enjoying live music, and searching for the best plate of Texas BBQ.

Where expertise leads, defensible outcomes follow. Jason helps clients bring the right experts to every matter.

SELECT EXPERIENCE

- Enterprise Technology Strategic Partnership: Built a strategic partnership with a leading global technology enterprise's litigation support group to provide comprehensive eDiscovery and forensic services for their highest-stakes litigation matters.
- Antitrust Litigation & Regulatory Inquiries: Partnered with corporate legal teams and litigation leadership on a multi-year, nationwide antitrust matter involving state and federal regulators, managing multi-terabyte data collections and extensive document productions.
- Global Energy Services & Engineering Centralization: Spearheaded the centralization of all forensic and eDiscovery needs for a major global energy services and engineering organization into a single centralized Relativity instance supported by a dedicated team providing comprehensive services, including Data Subject Access Requests (DSARs), eDiscovery, data breach response, and managed review workflows.
- Legal Operations & AI Integration: Spearheaded a comprehensive legal operations strategic assessment for a prominent artificial intelligence enterprise, establishing risk mitigation frameworks, defensible data disposition strategies, and automated EDRM workflows.
- Global Energy Litigation Support: Forged a multi-year partnership with a major multinational energy corporation, managing and supporting all of their most critical litigation matters and complex data challenges.
- Risk Mitigation & Compliance Programs: Worked with in-house counsel to provide targeted legal operations advisory services to minimize corporate exposure, designing internal risk auditing structures and deploying enterprise information management systems across global environments.
- Intellectual Property & Emerging Tech Disputes: Assisted outside counsel with expert advisory and testimony support for a leading artificial intelligence organization in high-profile copyright litigation against major media conglomerates.
- Complex Class Action Advisory: Worked with trial counsel to provide expert witnesses in high-stakes healthcare price-fixing litigation involving complex antitrust and class action claims.
- Forensic Technology & Trade Secret Investigations: Led multi-faceted digital forensics investigation in trade secret misappropriation litigation including assessing system architecture vulnerabilities and working with trial counsel to render expert consulting regarding proprietary platform developments.
- Global Financial Institution Services: Established an enduring strategic partnership with a leading global financial institution to deliver specialized forensic technology and litigation support services.
- Global Law Firm Forensic Support: Chosen via competitive selection to provide comprehensive digital forensics for a premier international litigation firm, acting as designated partner for global RelativityAir environment management while delivering end-to-end forensic and eDiscovery support alongside their legal technology advisory group.
